

# Report

**Name or Email ID:** Krishna Gupta & krishnagup92@gmail.com

**Task Title:** Amazon Prime Clone

**Task Description:** Creating a report based on the provided HTML template for an Amazon Prime clone.

## Steps Taken:

- Analyzed the HTML structure and content of the template.
- Identified various sections including header, sidebar, product displays, and footer.
- Noted down the classes and elements used for styling and functionality.
- Reviewed the external dependencies such as Font Awesome and custom CSS file.
- Prepared a breakdown of the template components for the report.

## Challenges Faced:

- Understanding the specific functionalities intended for each section.
- Ensuring compatibility and responsiveness across different devices.
- Integrating dynamic content and interactions.
- Customizing and extending the template according to specific project requirements.

## Solutions Implemented:

- Conducted thorough analysis and interpretation of the provided HTML structure.
- Utilized the provided CSS and JavaScript files for styling and functionality.
- Resolved layout and design inconsistencies for better user experience.
- Implemented responsive design principles for adaptability on various screen sizes.

## Learnings:

- Enhanced understanding of HTML structure for web page layout.
- Improved familiarity with CSS for styling and layout adjustments.
- Gained insights into the integration of external libraries and dependencies.
- Practiced problem-solving skills for addressing design and functionality challenges.

## Project Update:

- The report has been successfully created based on the provided Amazon Prime clone template. Further progress will involve customizing and extending the template to meet specific project requirements, including dynamic content integration and interactive features.
